 GitHub: github.com/sandeep

Motivated Computer Science graduate with strong interest in **software development, cybersecurity, and data analysis**. Skilled in **SQL, C#, Python, and web development** with hands-on experience building projects like web platforms and data analysis tools. Passionate about solving real-world problems through technology and continuously learning modern tools and frameworks.

TECHNICAL SKILLS

Programming Languages	Web Development	Database	Cybersecurity Tools	Tools & Platforms
Java	React.js	SQL	Wireshark	Git & GitHub
Python	Next.js	MySQL	Nmap	Visual Studio
C#	HTML	Supabase	Metasploit	Android Studio
JavaScript	CSS	Firebase	Shodan	Linux

EDUCATION

- **Master of Computer Applications (MCA)** 2024 – Present
Thakur Institute of Management Studies, Career Development & Research, Mumbai
- **Coursework:** Object-Oriented Programming with C#, Database Management Systems (DBMS), Operating Systems, Software Engineering, Computer Networks, Cyber Security
- **Bachelor of Computer Applications (BCA)** 2019 – 2022
K.P.B. Hinduja College of Commerce, Mumbai
- **Coursework:** Web Application Development, Android Development
Project : Smart Note Taking Android Application
Technologies: Android Studio, Java, Firebase, Google Maps API, OCR (Optical Character Recognition)

PROJECTS

- **Publcity – Creator Economy Platform** Link: github.com/sandeepsp1300/Publcity
Technologies: React.js, Supabase
 - Developed a platform connecting brands, influencers, and studio owners
 - Implemented multi-role authentication and booking system
 - Built database structure and integrated backend using Supabase
 - Designed scalable architecture for collaboration and campaign management
- **AI Career Analyzer (Concept Project)**
web version Link: github.com/sandeepsp1300/AutoLabAI Tech: Typescript.
Technologies: Python, Data Analysis
 - Designed a system to analyze future job demand and automation risk
 - Used data analysis techniques to evaluate labor market trends
- **Network Security Analysis Lab**
Technologies: Wireshark, Nmap
 - Performed network scanning and vulnerability analysis
 - Analyzed packet data using Wireshark
 - Practiced reconnaissance techniques using security tools

ACHIEVEMENTS

- Built multiple full-stack web applications independently.
- Actively learning cybersecurity tools and digital forensics techniques.
- Developed several technical projects showcasing problem-solving ability.
